

Throughout the world, the name ThyssenKrupp BILSTEIN is synonymous with innovation and high-tech engineering in the shock absorber market. With production facilities throughout the world, the company supplies products for the complete spectrum of damping applications. In addition, the name BILSTEIN has for many decades been closely associated with the most advanced technology in the field of suspension design, driving comfort and safety. In order to expand this position in the future, BILSTEIN became a division of ThyssenKrupp Technologies AG in 1988 and a wholly-owned subsidiary in 2005. The partnership and co-operation within the group will enable the company to continue to inspire with innovations in the traditional BILSTEIN way.

On top of this, ThyssenKrupp BILSTEIN has for many years now been a much sought-after partner in the motor sports and tuning sector. ThyssenKrupp BILSTEIN is an operative business unit in the Components Technology business area.

In 1995, AERO Race Wheels, located in Estherville, Iowa, was established by current owner F.L. "Skip" Miller on the conviction that this company and its dedicated staff could provide higher quality wheels designed specifically to endure the tough

requirements and conditions of the racing industry. Most importantly, the wheels needed to be manufactured and marketed while maintaining an affordable price structure. Since then, we have become the largest premier steel racing wheel supplier and our product line speaks for itself. It's not an understatement to say that we have made our mark in the racing community in just a short time.

AERO wheels can be seen accessorizing the locals at the dirt and asphalt tracks across the nation, as well as a majority of the teams on the Sprint Cup circuit. In fact, since November 2nd of 1997, AERO's 59 Series NASCAR wheel has won more Cup, Nationwide and Camping World Series races than all other brands combined.

We put our customers first and we appreciate the loyalty the racer's have for our company. We are willing to work with anyone who has a question or a problem. The only way to stay on top is to listen to the people putting us there. Everyone here at AERO welcomes your comments and thoughts. Thank you for using AERO Race Wheels, your support is greatly appreciated.

For more information call 888-895-2376 or contact us via e-mail info@aeroracewheel.com.

At Rod End Supply, we have the unique opportunity to be involved with all sorts of industrial, farming and high performance related industries including auto racing.

Since 1989, Rod End Supply has provided superior products priced competitively, with prompt and courteous service. Our promise is to continue to provide superior service with superior product that will keep you in the front of your field.

Swift Springs was founded in 1997 in Tokyo Japan as a motor sports division of Tokyo Hatsujo Manufacturing Co, Ltd. that has been leading the spring industry since 1924

The purpose was to demonstrate our superior engineering in spring by developing the next generation of motor sports suspension coil springs. They had to have the best characteristics of any brand or design in the market, which required the springs to be the lightest in weight and most durable, and to exhibit the most linear characteristics while still being cost effective.

Since the formation of Swift, it has been lead by the former racer and suspension expert, Kei Yokota, and the chief engineer, Yasu Saito.

Their first-hand involvement within the race industry has propelled Swift quickly through the ranks of some of the world's most reputable races. Swift springs quickly became one of the most recognized and respected name in performance coil springs in many genre of motor sports throughout the world. Being a part of the Tokyo Hatsujo spring corporation. Swift has a large collection of engineering research and development resources. Tokyo Hatsujo springs are used in most light to heavy industries and the dynamic has provided Swift with most advanced spring technologies and innovations available.

In Swift's impressive motor sports history dated back to 1998, first was with Nissan Skyline GT-R in the Super Taikyu Endurance championship series in Japan. Then Swift got involved with the championship teams in Le Mans 24hrs, Nurburgring 24hrs, Super GT (JGTC), Super Taikyu series, D-1 World Grand Prix, F3, F3000, Formula Toyota, Circle Track Racing (ashpalt/dirt) and many other world class races.

Preferred Chassie Builders

Bilstein Mod Lite STARS preferred chassie builders that focuses on building high quality mod lites and dwarf cars. For questions about parts or chassis contact:

Today, Hoosier Racing Tire Corp. is the largest race tire manufacturer in the world and all Hoosier race tires are still proudly "Made in the USA." The company continues to be privately owned and operated by the Newton family, co-founder Joyce Newton along with many of the Newton family members remain actively involved in the day-to-day operations of Hoosier. Hoosier has grown to be one of the largest employers in Plymouth, Indiana producing over 1000 different types of race tires. The company has its own 300-mph test wheel; a technology center; state-of-the-art, fully-integrated production facilities recently adding a high-tech mixing plant, with enough capacity to produce not only for Hoosier Racing Tire, but to have the ability to produce rubber for additional entities; not to mention a model sales and distribution network in Lakeville, Indiana which others seek to emulate.
