## 2018 Rule(s) Bulletin

**Bulletin 2018-1**

**November 15, 2017**

The following rule clarification pertains to the Modified Lite STARS Racing Series rules dated September 30, 2017 paragraph #26 Suspension & Shocks.

(With the economic downturn many weekend warriors have had to cut back or permanently postpone their racing activities until their financial outlook is a little brighter. Teams are attempting to stretch their racing dollar farther than ever. This isn't easy with the cost of parts, fuel, tires, and race entry fees going up, while at the same time purses are going down (the economy has been tough on track promoters as well). Budget Racing 101, by Curtis Dietzsch

### **Reference 2018 Modified Lite STARS Series Rules dated September 30, 2017**

## **26 SUSPENSION & SHOCKS**

**26.5 Shocks must be of all-steel construction, non-adjustable type. (May not be of a type that allows disassembly).**

**NOTE:** Although not recommended we understand that our drivers have their shocks re-valve which requires special tooling and takes place off site from the race track. The intent of this rule is to reduce cost. The Bilstein SG Series 6" – 7" travel shocks are approved and recommended for use within the Modified Lite STARS Racing Series.

The QA1 Twin Tube Shock or shock similar will not be allowed in any application within the rules of the Modified Lite STARS Tour.
