2016 Rule(s) Bulletin

August 24, 2016

Bulletin 2016-6 Paragraph 31 -1000cc MOTOR PROGRAM

31.1 GENERAL MOTOR SPECIFICATIONS

31.1.1 The intent of the stock engine is to use engines directly from a factory supplied street legal motorcycle, without any modifications whatsoever. If there is something that has not been addressed in the above specification, do not assume modifications can be made. You must request clarification from your governing body with any item that has not been directly addressed.

The following rule clarification regarding the 2016 Modified Lite STARS International Championship Tour rules dated September 30, 2015.

Effective immediately the Kawasaki Racing Exhaust-Camshaft part number 49118-0729, Kawasaki Racing Intake-Camshaft part number 49118-0728, Kawasaki Cam Sprocket part number 120460034 are not permitted.

See paragraph 31.1.1 above. The Mod Lite STARS 1000cc motor program is to run a stock engine and encourage all car owners to support this rule and to avoid the addition cost of a spec and super spec motor.
